

MICRO SOUNDHOLE TUNER

Designed specifically for acoustic guitar, ukulele, and other acoustic instruments, the chromatic Micro Soundhole Tuner remains perfectly concealed within the instrument's soundhole for discreet tuning. The non-marring universal mounting clip allows stress-free installation, while the highly sensitive piezo transducer senses vibrations directly from the soundboard for fast and accurate tuning response. The bright, multi-color display allows easy viewing in any environment. It's so small, convenient, and accurate, you'll want one for every acoustic instrument you own!

Power Button:
Press to toggle tuner on and off. Tuner automatically powers off in 10 minutes to save battery life.

Calibrate Button:
Press to adjust tuner calibration from A410 to A480Hz. Press and hold for rapid scroll.
